

Paraffin waxes and Hydrocarbon waxes, chloro, sulfochlorinated, saponified

SAMENESS CRITERIA

Dear Sief Member,

TFL France s.a.s as Lead Registrant will register *Paraffin waxes and Hydrocarbon waxes, chloro, sulfochlorinated, saponified* and the sameness proposed is as follow:

CAS number	68188-18-1
New EC number	939-314-6
Chemical name	<i>Paraffin waxes and Hydrocarbon waxes, chloro, sulfochlorinated, saponified</i>
Type	UVCB
Purity	100%
Raw molecular formula	<p><i>The substance defined as Paraffin waxes and Hydrocarbon waxes, chloro, sulfochlorinated, saponified covers substances obtained from raw material identified with cas n. 68188-19-2 after reaction with Sodium Hydroxide, having the following raw molecular formula:</i></p> $C_nH_xCl_y(SO_3Na)_z$ <ul style="list-style-type: none">• $n = 14-17; 18-31$• $z > 0,5$ for chain length 14-17• $y \leq 0.6$ for chain length 14-17<ul style="list-style-type: none">• $M_w > 300$
Impurities	No impurities affecting Classification and Labeling should be present. SVHC substances (C10-C13Chloroparaffins) should be below the legal threshold of 1000 ppm.
